### Summary

Bachelor's degree in Informatics from Telkom University (CGPA 3.39). Experienced in building server-side applications using Django and Go. Proven ability to design and implement efficient APIs and authentication systems. Eager to contribute to innovative backend development projects and grow as a back-end engineer.

### Work Experiences

#### **System Analyst and Design at PT. Nutrifood Indonesia & Kedaireka Telkom University**

July 2022 - September 2022

- Participate in basic training for the use of Django Framework.
- Perform API tests using Postman.
- Develop web applications using Django, HTML, CSS and DB.SQLite.

### Educations

#### **Telkom University / Universitas Telkom**

Teknik Informatika/Sarjana Komputer (S.Kom.)

Graduation year: 2024 - Cumulative GPA: 3.39/4.00

- Conducted research with title "Physical Activities Recommender System Based on Sequential Data Use K Mean Clustering."
- During my academic tenure, I learned about basic programming, data structures, object-oriented programming, machine learning, software development, and many more.

### Courses

#### **Professional Golang Bootcamp**

TalentDig, January 2025 - February 2025

- Working on RESTful API miniproject with CRUD operation and tested using Postman.
- Learned Go (Programming Language) in the field of Banking System
- Collaborate as a team and learned environment for development also in version control system (Gitlab, Github and Bitbucket).

#### **English course (Speaking)**

WE English Bandung, September 2024 - October 2024

- Conversation in English.
- Confident in speaking English.
- Understanding of grammar usage.

#### **Become a Master of Golang Programme**

Alterra Academy, August 2022 - December 2022

- Participated in training for Go-Lang language introduction.
- Working on RESTful API miniproject with CRUD operation and tested using Postman.
- Collaborate as a team with different divisions to work on a capstone project to create web application (OurGym).

## **Organization**

### **Staff Komisi Komunikasi dan Informasi (KOMINFO)**

#### **Badan Perwakilan Mahasiswa Informatika Telkom University**

June 2021 - May 2023

- Participate as the media officer of the BPM organization for the 2021 and 2022 periods.
- Participate and be active in organizational discussions and forums.
- Train communication skills as a form of delivering good information in forums.

## **Certifications**

### **Alibaba Cloud Academy - Big Data**

Alibaba Cloud Academy, November 2024 - December 2024

### **Hackerrank Problem Solving (Basic)**

Hackerrank, October 2024

### **Alibaba Cloud Academy - Cloud Computing Business User**

Alibaba Cloud Academy, October 2024 - November 2024

## **Projects**

### **Reconciliation Service**

*Professional Golang Bootcamp*

- **Technology used:** Go, Hexagonal Architecture, Unit Testing, Postman API, Mockaroo, Gitlab/Github.
- A service that measures matched and unmatched transactions between records in the internal system and bank statement inputs (csv formats).

### **Loan Service**

*Professional Golang Bootcamp*

- **Technology used:** Go, Hexagonal Architecture, Unit Testing, Postman API, MySQL, Gitlab/Github.
- A system for managing loan data, allowing users to submit loan requests and validate loan statuses.

### **Product Input System (CRUD) – Mini Project**

*Become a Master of Golang Programme*

- **Technology used:** Go & Echo, Hexagonal Architecture & Microservice, Postman API, MySQL, Github, Docker, Amazon Web Services/Heroku.
- A system for managing product data with categorized entries, featuring authentication to secure API access.

## **Skills**

### **Language**

English Language

### **Programming Skills**

Go (Programming Language), MySQL, Continuous Integration and Continuous Delivery (CI/CD), GitHub, Gitlab, Bitbucket, DBeaver, Postman API Platform, RESTful API, MongoDB, Python (Programming Language), Django (Web Framework), Apache Kafka, Microservices Development
